Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on September 8, 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Interpretation

1. The claim recited the limitation of "dearomatised petrol." For the purpose of examination, "dearomatised petrol" will be considered to be the same as "dearomatized gasoline."

Election/Restrictions

2. Applicant's election of group I, claim 1 in the reply filed on September 8, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kalwara et al (U.S. 5,409,987) in view of Gaile et al (RU 2,221,836).

Kalwara et al discloses a method for applying rubber onto a roof. The method includes providing an adhesive comprising polychloroprene rubber polymer, monoolefin based rubber polymers, tackifier resins, and depending on the particular polymers used, a combination of solvents such as cyclohexane, toluene, and n-heptane are used to form a flowable adhesive composition, applying the composition by spraying onto a

roofing substrates and applying the a roofing membranes to the applied adhesive. (Col 2, lines 24-32, Col 4, lines 10-45, Col 4, line 55 to Col 5, line 2) Kalwara et al is silent as to the solvent includes dearomatized petrol. However, providing dearomatized petrol or gasoline as a solvent is well known and conventional as shown for example by Gaile et al. Gaile et al teaches the fact that n-heptane and dearomatized gasoline are known to be equivalent for use as non-polar solvents. (See English abstract of RU 2,221,836)

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use dearomatized gasoline as a non-polar solvent as disclosed by Gaile et al in the method of Kalwara et al because these two materials are art recognized as equivalents. (See Kalwara et al, Col 4, lines 21-28)
